

Create a form similar to the following one:

The image shows a web browser window with the title 'Mysite'. The address bar displays 'mysite.com'. The main content area contains a registration form with the following elements:

- First Name**: A text input field.
- Last Name**: A text input field.
- Email**: A text input field.
- Address**: A larger text input field.
- Photo**: A label next to a 'Choose file' button.
- Buttons**: A red 'Cancel' button and a blue 'Submit' button at the bottom.

If a user presses the Cancel button, the form will become clear (all the fields will be empty). If the user presses the Submit button, he will be redirected to the following page:

The image shows a web browser window with the title 'Mysite'. The address bar displays 'mysite.com'. The main content area displays a user profile with the following information:

- Name**: Moumita Asad
- Email**: moumita@iit.du.ac.bd
- Address**: Dhaka Commerce College, Mirpur, Dhaka
- Profile Picture**: A circular avatar of a woman with red hair.

N.B:

- You are allowed to use only the following technologies: HTML, CSS, JavaScript, Bootstrap and PHP
- You can customize the color/font.
- All the fields must be filled up. So, you must validate the form using PHP¹.
- You must use meaningful names for the variables and functions.
